Company Profile

Connect with confidence.

Structured cabling, fiber optic distribution and rack infrastructure — supplied as one connected range.

WHO WE ARE

LOGX NETWORK is the connectivity brand of LOGX NETWORKS LTD, supplying the physical layer behind modern networks: copper and fiber cabling, patch panels, keystones, faceplates and rack accessories, engineered as one connected range rather than a shelf of unrelated parts.

Across the Middle East, LOGX products are carried and supported by our regional distributor, Networks Sea Company, based in Riyadh, Saudi Arabia — putting stock, pricing and technical support close to the project.

VISION & MISSION

VISION

To be the dependable physical layer behind every network we touch — infrastructure that installers trust and that disappears into the work.

MISSION

To supply a single, connected range of copper, fiber and rack products, specified around repeatable installation, tested performance and clear documentation, so every project ships with confidence.

WHY LOGX

Consistency first

Every product is specified around repeatable installation, dependable materials and the realities of the network room.

One connected range

Copper, fiber, patching and rack accessories are designed to work together across enterprise and data center environments.

Documented performance

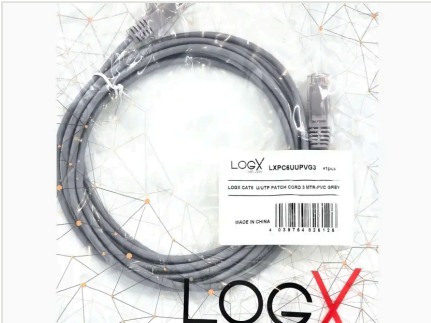

Copper cable ships Fluke channel tested, and every product family carries a technical datasheet with standards, characteristics and ordering information.

LOGX products are specified against the standards installers already design to.

- ✓ ANSI/TIA-568.2-D & ISO/IEC 11801, category 6 / 6A
- ✓ IEEE 802.3 Ethernet and PoE standards
- ✓ RoHS & REACH compliant materials
- ✓ CE and UL 94V-0 fire-safety rated components
- ✓ ISO 9001 manufacturing quality standards

PRODUCT RANGE

Three categories, one connected system.

Copper cabling

CAT6 and CAT6A UTP cable, patch cords and bulk reels, Fluke channel tested.

14 ITEMS

Fiber optic

Single-mode and OM3 drop cable, patch cords, pigtails, splice and distribution panels.

36 ITEMS

Racks & accessories

Patch panels, keystones, faceplates, cable managers, RJ45 plugs and PDUs.

15 ITEMS
